Citigroup
Business analyst/Consultant

Columbus, Ohio
(June 2008 – May 2011)

- Providing support in Fund Accounting application development project in Global Transactions Services department of Citigroup
- Supporting the Citi Fund Services mission through analysis, development and management of business requirements for system functionality and media output needed for the Financial Services and Transfer Agency Operations, and Clients.
- Supporting the day to day Business Activities for the Business Unit in Citi Columbus and Citi Canada and resolve any application related issues that arise in their day to day processing
- Liaising with the support teams based out of Citi UK, Citi Poland to resolve any database related issues with the application
- Assisting in the management of vendor resources toward the successful and timely completion of projects or issues, allowing the highest degree of productivity, thereby ensuring Client and Shareholder satisfaction.
- Responsible to elicit, analyze, validate, specify, verify, and manage the needs of the project stakeholders, including customers and end users.
- Analyze historical financial data of our clients in order to provide reports using *MultiFonds* Fund Accounting software. Work closely with the IT team by explaining the financial data.
- Critically evaluate the information gathered from multiple sources, reconcile conflicts, dismantle high-level information into details, abstract up from low-level information to a more general understanding,

distinguish presented user requests from the underlying true needs, and distinguish solution ideas from requirements.

- Represent requirements using alternative views, such as analysis models, prototypes, or scenarios.
- Translated the business needs into system requirements, communicating with the business on a non-technical level, and with the System Analyst on a more technical level
- Establish and maintain effective relationships with project sponsors, clients or business units, and vendors.
